

Dear parents, guardians of children and adult learners!

The Psychological-Pedagogical Counselling Centre is an institution providing comprehensive psychological, pedagogical and speech therapy diagnostic services for children from birth to 18 years or adult students.

The Counselling Centre is worth contacting when:

- a child or adult learner is experiencing learning difficulties
 - has communication or behavioural difficulties.
- Parents/guardians/adult learners can seek help on their own initiative and be assured that help is provided in a confidential manner.
 - Anything you learn verbally or receive as the conclusion of a comprehensive assessment in the form of a document – is communicated only to you.
 - The counselling centre doesn't share the findings of the diagnosis with anyone other than parents/guardians or adult learners.

Counselling centres are state institutions that are there to help the child and his/her parents/guardians.

If you are concerned about your child's mental development, you are encouraged to contact a Counselling Centre. There is at least one such institution in every county.
